Revenue acceleration for lawyers.

The legal market has changed. Law Firms now live in a competitive, data-driven business world – where any law firm can approach any client, anytime. In this competitive world, law firms can no longer work in silos and passively wait for clients to come to them. To stay competitive, lawyers and law firms must break down knowledge barriers, share resources and go from passive to active and collaborative business developers.

To help lawyers move from passive to active business development, Nexl has created the Revenue Acceleration Flywheel, a three-step system that allows a law firm to drive revenue using Sales Enablement, Strategic Client Management and Account-Based Marketing.

This is how Nexl works.

Nexl automatically captures all of your lawyers' interactions. Any email sent or received and any meeting with clients, prospective clients or referral sources are automatically captured, analysed and turned into actionable insights to help you accelerate revenue growth.
